CAREER OBJECTIVE

Computer Science undergraduate specializing in Artificial Intelligence with hands-on experience in building data-driven applications. Proficient in Python, data structures, and machine learning fundamentals. Developed projects in recommendation systems and financial data analysis.

EDUCATION

B.Tech, Computer Science & Engineering
Pandit Deendayal Petroleum University

2024 - 2028

TRAININGS / CERTIFICATIONS

Applications Of Mathematics In Machine Learning Through Analytics

Jan 2025

Gujcost, Ahmedabad

PROJECTS

[MARKET TREND ANALYSIS ↗](#)

Jan 2026

Built a financial data analysis tool using pandas, matplotlib, and yfinance to analyze historical stock prices. Implemented technical indicators such as moving averages to identify bullish and bearish trends. Visualized time-series data to support pattern recognition and decision-making. Tech Stack: Python, Pandas, Matplotlib, yfinance.

[MOVIE RECOMMENDATION SYSTEM ↗](#)

Dec 2025

Developed a content-based recommendation system using TF-IDF vectorization and cosine similarity on the TMDB dataset (~5,000 movies). Built an interactive web application using Streamlit to provide real-time movie recommendations with poster previews. Optimized similarity computation for faster query response. Tech Stack: Python, Pandas, Scikit-learn, Streamlit.
